PROFESSIONAL SUMMARY

Results-oriented Programmer Analyst with hands-on experience building and optimizing backend solutions. Skilled in developing **Node.js applications and AWS serverless architectures** that boost performance and scalability. Known for improving reliability of production systems, strengthening code quality through **robust unit testing**, and collaborating effectively in Agile teams. Strong foundation in **JavaScript, cloud services, and modern software practices**, with a focus on delivering solutions that create measurable business impact.

RESTful APIs

Agile

EXPERIENCE

PROGRAMMER ANALYST | 09/2023 to Current

Cognizant Technology Solutions - Chennai, India

- Developed and maintained scalable **Node.js applications** with focus on backend APIs, Lambda functions, and microservices architecture.
- Designed and implemented **AWS cloud solutions** using services like Lambda, API Gateway, DynamoDB, S3, and CloudWatch, improving system reliability and performance.
- Built and optimized **serverless workflows** for coupon and rewards management systems in the retail domain, reducing manual interventions.
- Wrote and executed **unit tests with Jest** to ensure high code quality and maintainability, increasing test coverage.
- Collaborated with cross-functional teams in Agile environment, contributing to sprint planning, code reviews, and CI/CD deployments.
- Worked with **SQL, JavaScript, Java, and Spring Boot** for integrations and legacy system support.
- Utilized **AWS monitoring and logging tools** to debug, analyze, and improve application performance.

PROGRAMMER ANALYST TRAINEE | 02/2023 to 06/2023

Cognizant Technology Solutions - Chennai, India

- Assisted in developing and testing Java/Node.js web applications, enhancing debugging and problem-solving skills.

- Collaborated with senior developers to design and implement REST APIs for seamless client-server communication.
- Worked with MySQL/Oracle databases, writing queries and optimizing stored procedures for performance.
- Gained exposure to AWS services (EC2, S3, Lambda, API Gateway) for cloud deployment and monitoring.
- Contributed to the SDLC (requirements, coding, unit testing, documentation) within an Agile environment.
- Built a mini-project to apply programming concepts and strengthen problem-solving skills.
- Used Git/GitHub for version control and team collaboration.

EDUCATION

Sri Sai Ram Engineering College - Chennai, India | B.Tech
Information Technology, 05/2023

CERTIFICATIONS

AWS Certified Cloud Practitioner | 01/2025

AWS Certified AI Practitioner | 03/2025

AWS Certified Solutions Architect Associate | 09/2025
